DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-15, 18-27 and 30-46 are rejected under 35 U.S.C. 102(b) as being anticipated by Leahy et al. (5,868,177). Leahy et al. disclose, in figs. 1-5, a method comprising providing an end-user liquid fuel dispenser 86, 122-128, a liquid fuel (fuel A-D), a plurality of fuel additive A-E and 120, and a selector (controller 70 and computer 72).
3. Claims 1-16, 18-28 and 30-46 are rejected under 35 U.S.C. 102(b) as being anticipated by Zinsmeyer (5,018,645). Zinsmeyer discloses, in figs. 1-4, a method comprising providing an end-user liquid fuel dispenser 32, a liquid fuel 35, a plurality of fuel additive 30, and a selector (4-10).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 6, 17, 22, 29 and 40 are rejected under 35 U.S.C. 103(a) as being unpatentable over Leahy et al. or Zinsmeyer.

Art Unit: 3754

In regard to claims 6, 22 and 40, to the degree it can be argued that Leahy or Zinsmeyer does not disclose at least one of fuel additive as claimed.

It would have been obvious to provide the as least one fuel additive as claimed in the invention of Leahy or Zinsmeyer in order to improve better the effectiveness of the of the liquid fuel as one desires.

In regard to claims 17 and 29, it is well known in the art to use a trademark to label for a product. Therefore of it would have been obvious to one having ordinary skill in the art at the time the invention was made to use the trademark of at least on fuel additive as a indicia for indicating selection of the corresponding the at least on fuel additive.
